

How *VibraLITE*[®] can help with:

BEDWETTING

(INVOLUNTARY PASSAGE OF URINE DURING SLEEP)

An Awakening Routine to urinate at specific times after going to bed is made easy with "VibraLITE". The vibration feature has definite benefits compared to an audible alarm clock when you do not want to awaken other household members. Children are comfortable using "VibraLITE" while spending nights away from home for camps, sleepovers, overnight field trips etc. because of the silent reminders that do not alert anyone else.

When the alarm(s) or Countdown Timer is activated, vibrations on your wrist alert you.-The auto repeat countdown timer can be used if the schedule is on an interval basis (i.e. every 3 hours) It will automatically reset and countdown again and again every 3 hours each time it reaches zero. These "interval" reminders are preset once and continue to repeat until you turn the countdown OFF with a push of a button. Setting preset alarms for specific times during the night is also an optional way of avoiding incidents.

Also use "VibraLITE" to remind you to take any medications at the correct time. Set an alarm to remind you to do your daily Kegel (Pelvic Floor) Exercises or for any other reminders needed during the day.

DISCLAIMER

GLOBAL ASSISTIVE DEVICES, INC. DOES NOT ACCEPT ANY RESPONSIBILITY WHATSOEVER FOR ANY INCONVENIENCE OR NONCOMPLIANCE FOR MEDICATION OR ANY OTHER PURPOSE THE "VIBRALITE" WATCH IS USED FOR.

CONSULTATION WITH YOUR MEDICAL PROVIDER SHOULD ALWAYS BE DONE WHEN ATTEMPTING TO CONTROL OR TREAT ANY MEDICAL CONDITION.
